

ICAST 2017

Award Winning

PROP FROG

The double prop feet make a lot of noise and disturbance on the water surface, which make it an easy target to track down. Active and reactive fish cannot resist its call.

Prop Series

PROP TURTLE

The Lunkerhunt Prop Turtle is great for covering water and hauling in fish. It casts far and blasts out a bubble trail that calls fish in from a distance. The Prop Turtle excels in open water and crashes through light cover like a plough. Its unique shape and prop feet displace water and create a wake that fish can't resist. When fish hit, a full set of weedless hooks is ready to greet them. The hook system on the Lunkerhunt Prop Turtle has been designed to deflect from cover, but hang on to fish.

The Lunkerhunt Prop Turtle is available in four fish catching patterns.

Predators looking for an easy meal usually pick off the weak, slow, or injured in a pack. Why not offer curbside pickup on their next order?

Lunkerhunt's Easy Prey hardbait mimics a wounded baitfish kicking through its final moments, making it an easy target for your next catch.

This double-jointed lure sits horizontally in the water, and is dressed with three feathered treble hooks giving it a unique presentation at rest, and a high hookup probability in action.

Once you start a retrieve, it kicks back to life with a vertical wobble just like an injured baitfish. At rest, this lure will float back up in the water column, driving fish crazy.

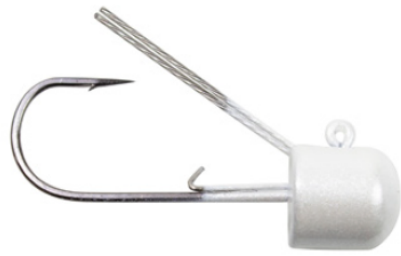

Weedless

MUSHROOM HEAD JIG

Lunkerhunt Weedless Mushroom Head Jigs are great for soft plastics, especially Lunkerhunt Finesse Baits. They are built around a premium, 90 degree, black nickel baitkeeper hook that securely holds plastics in place. The nose of the jig is rounded and has weight forward engineering that lifts plastics upright when sitting on the bottom, but pendulums around to create a horizontal presentation on the retrieve.

Lunkerhunt Weedless Mushroom Heads have 4-units in a package.

Pre-Rigged

FINESSE BAIT

Lunkerhunt's Pre-Rigged Finesse baits are ready to fish right out of the pack. Each Lunkerhunt Finesse package comes with one rigged body and two spares. Pre-rigged finesse baits target a wide variety of freshwater and saltwater gamefish species. The quarter ounce jig head is heavy enough to cast on most rod and line configurations but light enough to keep the bait resting gently on the bottom. Lunkerhunt Finesse Baits have the perfect combination of weight and flotation that allows the bait to stand up off the bottom and to move with the action of the retrieve and current.

SKITTER LIZARD

The Skitter Lizard by Lunckerhunt keeps with our drive to create new, cutting edge, innovative ideas and be first to market with them. The Skitter Lizard is a soft body lizard that provides the angler with an opportunity to fish top water in a very different way. From the soft curly tail that churns up the water to the perfectly placed weedless hooks and the swimming arms, this bait will blow the minds of all that see it in action.

BIG EYE TAIL SPIN

You'll look just as shocked when you see everything this little guy has to offer! Glow-in-the-dark patterns, an enticingly bladed tail, sharp heavy-weighted short shank hooks, and a pair of thunderstruck wide eyes that bring everything together. The Lunkerhunt Big Eye Tail Spin has it all, making it an effective feature-heavy little lure that's easy to target and excels in the water. Ideal for both vertical jigging or extra long casts to schooling fish, once you see it in action you and the fish will be hooked.
